
FOR IMMEDIATE RELEASE: June 17, 2013

Harmony Unites

SKYREACH L&S Extrusions Corp. is proud to introduce the Harmony Series PERFECT© Patio Door to its growing line of meticulously engineered products.

The sleek, modern Harmony PERFECT© Patio Door is available with a welded sash and a frame system that's fully welded or mechanically-joined. The sash stile is reinforced to add strength and rigidity to the frame. Available in 5', 6' and 8' width and 6'8" and 8'0" height, the single or double slider configuration of the Harmony door is cleverly designed and easy to install. Available in a variety of aesthetically-pleasing multi-panel system combinations, custom styles and finishes, the Harmony will make the most of any view.

"The Harmony door has a deep pocket interlock for air and water resistance", says Bob Green, sales manager –building products. "As its name implies, this door unifies style and functionality in any environment and is available in the popular extruded colours of White, Beige and Clay."

Harmony Unites (continued)

Visit www.skyreachls.com to learn more about the Harmony patio door, or contact Bob Green, BPG Sales Manager at: bgreen@skyreachls.com.

SKYREACH L&S Extrusions Corp. was reinvented from its precursor in 2011 when a Hong Kong listed company, LIANSU Holding – Stock Code 2128, invested heavily to establish manufacturing facilities in Canada, USA and China. The first North American manufacturing facility and the Canadian headquarters is located in Vaughan, ON, Canada. SKYREACH's first warehouse and fabrication facility in the USA was established in Orange, CA. As a matter of course, warehouse and manufacturing operations have been set up in the Chicago, IL area of the midwest to further meet increasing demand.
