

Meet the Modern Traditionalist

SGI-005 HERITAGE Series Window System

Understanding HERITAGE Strengths

The SGI-005 Heritage Series Window System is made with the efficient use of sash profiles that are designed for dedicated applications. Integrated sash lift handle and interlocks eliminate the need for snap-in profiles, ensuring many years of worry-free operation. The reduced number of parts required to fabricate this window results in a low-maintenance, better performing product.

How can the HERITAGE be both Modern and Traditional?

It's simple. The Colonial contoured design and clean lines of the Heritage Series gives consumers a beautiful and traditional woodcrafted look while maintaining the performance and durability of modern vinyl windows. The right combination of form and function makes this high-performance window system both a modern and traditional choice.
